

Welcome to my comprehensive DeckStats V2.00 11.20.2021

Reporting till 8 Dec '21 01:24:28 10 Dec 2021 12:11

ED's determined by a formula measuring average top 4 losing & 4 player wins & losses, whether the deck has a winning or losing record, the success of the decks "Present" starts. It is a very accurate estimate, and factors are rounded up so they may even be embellished. This estimation only accounts for about 15-20% of the total games in this time frame. Enjoy!
